## **.Asia: Dedicated to the Asia-Pacific Region**

The Asia-Pacific economic region encompasses the world's fastest growing markets and one-third of the world's Internet users reside in Asia-Pacific nations. .Asia domains are expected to rank well within the search engines because Asia is a natural term and there are early indications of good investment potential in the domain extension.

.Asia is the new regional top-level domain dedicated to the Asia-Pacific region, which spans from Turkey to Australia. Show presence and protect your trademarks in the world's fastest growing markets by registering your .Asia domains today.

### **Best Practices**

Webnames.ca recommends Canadian businesses and organizations protect their intellectual property by proactively registering core domain names, trademarks and brands in the .Asia extension.

### **Pricing**

Ongoing registration : \$35.00 US/year (1-10 year terms)  
Renewals : \$35.00 US/year  
Registrar transfer : \$35.00 US/year

### **For additional information**

To have your Webnames.ca account representative register the .Asia extensions of your primary domain names, or provide other recommendations specific to your domain portfolio contact:
